

THE LEARNING LAB

Primary 6 PSLE Preparation Programme 2025 English

- Consolidating knowledge and mastery of the topics and skills tested for English in the PSLE.

Topics/skills covered	Lesson Components
Composition Writing	<ul style="list-style-type: none">• Composition module, with a focus on correcting common writing pitfalls<ul style="list-style-type: none">○ instructional document which highlights some of the common writing mistakes made by students○ exercises to allow students to practise correcting common mistakes• Composition module, with a focus on editing<ul style="list-style-type: none">○ quick sheet featuring success criteria and the different literary techniques learnt and what students should check for in their writing○ writing practice to hone students' metacognitive skills when it comes to editing their compositions
Comprehension	<ul style="list-style-type: none">• Comprehension module, with a focus on answer precision<ul style="list-style-type: none">○ recap of common mistakes made during the comprehension paper○ exercise to hone students' answer precision skills○ practice test to give students exposure to different question types
Cloze Passage	<ul style="list-style-type: none">• Cloze passage module, with a focus on question analysis<ul style="list-style-type: none">○ instructional module which recaps the different questions tested in a cloze passage (e.g. fixed expressions / collocations / phrasal verbs)○ exercises to test students' understanding○ practice test to give students exposure to different question types

- Preparing for examinations by familiarising students with the examination format and strengthening techniques for answering common questions
- Monitoring thinking processes and performance to anticipate potential errors and avoid common misconceptions
- Affirming positive mindsets to effectively handle stress and anxiety
- Developing study and revision plans

THE LEARNING LAB

Primary 6 PSLE Preparation Programme 2025 Mathematics

- Consolidating knowledge and mastery of skills for the following topics tested for Mathematics in the PSLE

Topics/skills covered	Lesson Components
Circles	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept map to consolidate all necessary concepts and formulae○ Revision handout to consolidate content knowledge, provide ample practice on analysis of common/new PSLE question types and identification of concepts
Higher Order Thinking	<ul style="list-style-type: none">• Focus on noteworthy PSLE questions<ul style="list-style-type: none">○ Exposure to problems that require the application of higher-order thinking skills○ Hone answering techniques to solve non-routine problems
Geometry	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept map to consolidate all necessary concepts and formulae○ Revision handout to consolidate content knowledge, provide ample practice on analysis of common/new PSLE question types and identification of concepts
Volume	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept map to consolidate all necessary concepts and formulae○ Revision handout to consolidate content knowledge, provide ample practice on analysis of common/new PSLE question types and identification of concepts
Number Patterns	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept map to consolidate all necessary concepts and formulae○ Revision handout to consolidate content knowledge, provide ample practice on analysis of common/new PSLE question types and identification of concepts

- Preparing for examinations by familiarising students with essential concepts/noteworthy PSLE questions and strengthening answering techniques to common questions
- Monitoring thinking processes and performance to anticipate potential errors and avoid common misconceptions
- Affirming positive mindsets to effectively handle stress and anxiety
- Developing study and revision plans

THE LEARNING LAB

Primary 6 PSLE Preparation Programme 2025 Science

- Consolidating knowledge and mastery of skills for the following topics tested for Science in the PSLE

Topics/skills covered	Lesson Components
Plant System	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept Map: Consolidates all necessary concepts and keywords for the topic○ Revision Quiz: Covers frequently-appearing questions and application questions to build content knowledge and to provide ample practice on answering techniques. Novel questions which present concepts in an unfamiliar context are also included to train students on different techniques to apply their knowledge to unfamiliar questions○ Topical Test: Includes common multiple-choice questions to test students' understanding and to diagnose areas that require improvement
Human Body System (Digestive System, Respiratory System, Circulatory System)	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept Map○ Revision Quiz○ Topical Test
Reproduction and Heredity	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept Map○ Revision Quiz○ Topical Test
Reproduction in Plants	<ul style="list-style-type: none">• Topical revision<ul style="list-style-type: none">○ Concept Map○ Revision Quiz○ Topical Test
Exam Techniques – Error Analysis Practice	<ul style="list-style-type: none">• Focus on Error Analysis<ul style="list-style-type: none">○ Recognise common pitfalls made when answering open-ended questions○ Hone answering techniques such as identifying key phrases needed to answer open-ended questions

- Preparing for examinations by strengthening answering techniques to common questions and applying a systematic approach to question analysis
- Monitoring thinking processes and performance to anticipate potential errors and avoid common misconceptions
- Affirming positive mindsets to effectively handle stress and anxiety
- Developing study and revision plans
